**-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --**

**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## **DETAILED ACTION**

### ***Drawings***

1. The drawings are objected to as failing to comply with 37 CFR 1.84(p)(4) because reference character "112" has been used to designate both polishing pad and the carrier's drive shaft, in Fig. 2. Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

### ***Claim Rejections - 35 USC § 102***

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 1, 3-5 and 7 are rejected under 35 U.S.C. 102(b) as being anticipated by Lee et al. (6,146,241).

Lee et al. discloses all of the limitations of claims 1, 5 and 7, i.e., a method and apparatus for polishing a wafer comprising loading a wafer in a carrier (215); rotating the wafer and the platen in opposite directions (09:34-35); reversing the direction of rotation of one of the carrier or the pad, e.g., (02:14-16), wherein the apparatus further includes a first drive (134) to

rotate the carrier; a platen (110); a second drive (132) for rotating the platen; and a controller (130) to reverse the rotational direction(s).

Regarding claims 3 and 4, Lee et al. meets the limitations, Lee et al. discloses that the pad is rotated in either a clockwise or counterclockwise direction while the sample holder is rotated about a second axis in either a clockwise or counterclockwise direction, which includes embodiments meeting both claims 3 and 4.

### Claim Rejections - 35 USC § 103

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. Claims 2 and 6 are rejected under 35 U.S.C. 103(a) as being unpatentable over Lee et al. in view of Becker et al. (6,273,797).

Lee et al. meets all of the limitations of claims 2 and 6 as indicated above, except for disclosing spraying the pad with high pressure liquid. Becker et al. teaches in-situ conditioning method and apparatus with high pressure conditioning sprays nozzle to clean the pad through out polishing (Abstract).

Art. Unit: 3723

It would have been obvious to one of ordinary skill in the art, at the time the invention was made, to modify the invention of Lee et al. with high spray system and application as taught by Becker et al. to enhance and augment the dislodging of particles (Lee 01:59-60).

### ***Conclusion***

6. Prior art made of record and not relied upon are considered pertinent to applicant's disclosure. Sandhu et al. and Moore are cited to show related inventions.
